EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS

Claim 1, line 4, the word -- and -- has been inserted after the word "solution,".

Claims **11-20** have been cancelled.

This application is in condition for allowance except for the presence of claims 11-20 directed to a cathode roll and a method using the cathode roll non-elected without traverse. Accordingly, claims 11-20 been cancelled.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims **1-5, 7-8 and 21** are allowable over the prior art of record because the prior art does not teach or suggest a method for producing a plated film, comprising the steps of carrying, passing and carrying as presently claimed, esp.,

wherein the conductive surface of the resin film is brought into electrical contact with the cathode roll through an electrolyte layer for electroplating a plating layer on the

conductive surface of the film, and

wherein the following relation is satisfied:

$$E_0 > [(I/Cs) \times d]/\sigma$$

where E_0 is the reduction potential of a metal constituting the plating layer; I is the value of a current flowing through the cathode roll for plating; Cs is the area of the conductive surface of the resin film in electrical contact with the cathode roll through the electrolyte layer; d is the thickness of a gap between the cathode roll and the conductive surface of the resin film; and σ is the conductivity of a liquid constituting the electrolyte layer.

The prior art does not contain any language that teaches or suggests the above. *JP 63-250492* teaches jetting an electrolyte solution from nozzles **12, 13** onto the rolls **2**. However, when the electrolyte solution is jetted onto the rolls, the electric current is not supplied to the rolls. Therefore, a person skilled in the art would not have been motivated to adopt the above conditions, and a *prima facie* case of obviousness cannot be established.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to EDNA WONG whose telephone number is (571) 272-1349. The examiner can normally be reached on Mon-Fri 7:30 am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam Nguyen can be reached on (571) 272-1342. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
